

# INFINITY BULK LOGISTICS

Best Choice in Tank to Tank Solutions

"Infinity Bulk Logistics is a subsidiary of Infinity Logistics & Transport Sdn Bhd. We are a global flexitank operator and have been ranked number 5 in the world in terms of the number of flexitanks operated. Our journey will not halt at this juncture as we are striving to be ranked number 3 and we are devoting adequate efforts and strategy to attain our next milestone. Our state-of-the-art facility enables us to meet exclusive requirements from our customers and we have never failed them.

*~ Dato' Chan Kong Yew ~  
Managing Director*

"We are involved in flexitanks from supply-and-fit to tank-to-tank services and have direct control over the production and the designing of our Flexitanks. The tanks are fabricated from FDA approved food grade Polyethylene and Polypropylene which are suitable for a wide range of non-hazardous liquid cargo".

*~ Mr Teo Guan Kee ~  
Vice President*

1. A global flexitank operator which operates from 5 continents.
2. Ranks number 5 in the world in terms of number of flexitanks operated annually.
3. A recognized and certified global operator.
4. A manufacturer cum operator with capacity of more than 100,000 per annum.
5. Managed by a group of professionals who has more than 20 years of experience.
6. Flexitanks are accepted by most of the major shipping lines.

## VISION

To be a leading global flexitank operator with world-class services.

## MISSION

To be an excellent liquid logistics operator that emphasizes on quality, responsibility and customer care.

## OUR SERVICE EXCELLENCE

- We are customer oriented and endeavour to cater to all your bulk logistics needs. Our employees are the most valuable resources that play a critical role in the growth and development of our company.
- We aim to be a leading regional bulk logistics provider with world-class services to our customers, tailoring our services to various industries.
- We are a manufacturer of multilayer flexitanks that are customizable to different users' requirements with manufacturing facilities in Malaysia.
- Our state-of-art manufacturing facilities have the capacity of producing over 100,000 flexitanks per annum. We conduct in-house quality control, performing vigorous product testing in a controlled environment using advanced test equipment including ultrasonic leak detector.
- We have a network of agents and fitting professionals who enable fitting and logistics servicing internationally.
- Our competent Emergency Response Team (ERP) and independent surveyors are always prepared to attend promptly to incidents at all major strategic locations.

# OUR PRODUCTS

## Multilayer Flexitank

### Polyethylene (PE)

Our flexitanks are fabricated from approved Food & Drug Administration (FDA) food grade Polyethylene which is suitable for a wide range of non-hazardous liquid cargo.

### Polypropylene (PP)

The liners are made from layers of 110 to 300 microns of Polyethylene and the Polypropylene (PP) woven bags come in a tubular design with no joint sides. The construction of these bags ensures that the bags are able to withstand higher impact.

### Valve

Our state-of-the-art valve is specially tailored and designed by our own R&D team and tested in-house for leakage. The valves are optimally designed to produce defect free flexitanks.

## Bulkhead

- Bulkhead A - Consists of 5 steel bars
- Bulkhead B - Consists of 6 steel bars
- Bulkhead C - Consists of 2 steel bars and 1 steel frame
- Bulkhead D - Consists of 2 steel frames

## OUR ACCESSORIES & FEATURES

- **Heating Pad**  
To liquefy solidified cargo at point of discharge.
- **Insulation Liner**  
To reduce the rate of temperature fluctuation, enabling product to retain their original characteristics.
- **Tub Liner**  
To provide extra protection and act as containment for minor spillage/leakage.
- **Anti-Bulging System**  
To provide support to the container side panel, preventing any deformation of container caused by internal pressure and mishandling.
- **Heat Exchanger**  
To re-melt solidified cargo.

## TANK TO TANK SOLUTIONS

Our multimodal capability can assist in improving our customers' supply chain through the use of the same flexitank from loading at the supplier's tank until discharge at receiver's tank without any intermediary handling of the cargo.

### Benefits of Tank to Tank :

- Does not require extensive handling for loading and discharging.
- Direct delivery to tank offers excellent commercial advantage.
- Elimination of overhead costs.
- Peace of mind with One-Stop-Solution.
